

The **NXT step** of
your career starts with

EXECUTIVE PROGRAM IN

DevOps **with** AWS

From The Director's Desk...

In today's digital economy, career growth is no longer defined by years of experience alone, but by how effectively one adapts to change. Technologies evolve, industries transform, and professionals who stay relevant through upskilling are the ones who lead.

At Itvedant, we've built programs specifically for aspirants who recognize the importance of continuous learning. These courses are crafted not just to teach tools and technologies, but to instill the kind of applied knowledge that translates directly into business impact.

Our curriculum is informed by constant dialogue with industry leaders, ensuring every module, every assignment, and every session addresses current needs and future trends. Whether you're aiming to switch domains, move into a leadership role, or enhance your expertise, our mission is to support that transition with precision & intent.

Learning at this stage of your career is an investment, and our role is to ensure that it yields measurable returns. We are committed to delivering value not just in content, but in outcome. We look forward to being part of your growth journey.

Industry-Oriented Curriculum to upskill your career

Fundamentals of DevOps

DevOps - What is DevOps | History of DevOps | Why DevOps | Lifecycle | Benefits | Overview - Git, Jenkins, Docker, Kubernetes, Terraform, AWS Cloud.

Git & GitHub - What is Git | Installation of Git | Why Git | Version Control | Initialization | Clone | Commit | Pull | Push | Commit | Branching | Merging | Repository | Collaboration.

Linux- What is Linux | What is Ubuntu | Installing Ubuntu | VMWare | Virtualization | Files | Directory | Commands - ls, pwd, whoami | Permission - CHMOD, CHOWN | Package Management - apt, yum, netstat, ping, curl | Process Management - ps, top, kill, nohup, crontab | Logging - Top, Free, Iostat, Df, Ps, Uptime | Monitoring - tail, grep, journalctl, syslog.

AWS Cloud- Introduction to Cloud Computing | What is Cloud | Global Infrastructure (Region, Availability Zones, Edge Locations) | AWS Identity and Access Management - IAM User, IAM Role | Virtual Private Cloud - VPC, Subnet, Nat Gateway, Internet Gateway, Peering, Internet Protocol | Compute - Elastic Compute Cloud (EC2) | Storage - Simple Storage Service (S3).

Devops

Jenkins - What is Jenkins | Why Jenkins | History | Use Cases | Continuous Integration | Continuous Deployment/Delivery | Installing Jenkins | Configuring Jenkins | Understanding Jenkins User Interface | Client Slave Architecture | Declarative Pipeline | Scripted Pipeline | Jenkinsfile | CICD Pipeline | Jenkins using AWS | CICD Pipeline in AWS Cloud - AWS Code Build, AWS Code Deploy, AWS Code Artifact, AWS Pipeline | Backup and Restore 27 Hours.

Docker - What is Docker | History of Docker | Why Docker | Container V/s Virtual Machines | Docker Installation | Docker Hub | Docker Daemon | Commands - Docker run, Docker ps, Docker build, Docker images, Docker logs | Dockerfile Language | Writing Dockerfile | Building Dockerfile | Defining Containers | Defining Multi Container | Docker-Compose | Docker on AWS - Elastic Container Registry (ECR), Elastic Container Service (ECS), Fargate | Setting up Docker on EC2 | Storing and Running Docker on AWS.

Kubernetes - What is Kubernetes | History | Why Kubernetes | Use Cases | Pods | Nodes | Services | Deployment | Replica Sets | Install Kube CLI | Commands - kubectl get pods, kubectl create, kubectl logs, kubectl apply, kubectl delete, kubectl config | Implementation | Creating Cluster | Deploying Cluster | Kubernetes on AWS Cloud - Elastic Kubernetes Service (EKS) | Integration with ECR | Scaling - Pod Autoscaler, Cluster Scaler.

Infrastructure as Code (IaC) - What is IaC | What is Terraform | Why Terraform | History | Use Cases | Declarative v/s Imperative Programming | Terraform Concepts - Providers, Resources, Variables, Outputs | Installing Terraform | Introduction to Modules | Writing Modules | Using Modules | Deploying Infrastructure using Modules | Reviewing Infrastructure using Modules | IAC on AWS Cloud - AWS CloudFormation | CloudFormation Template | CloudFormation Stacks | CloudFormation Resources | CloudFormation Outputs | CloudFormation Template Designer | Cloud Development Kit.

Ansible - What is Ansible | History | Why Ansible | Use Cases | Agentless Architecture | Concepts: Playbooks, Inventory, Modules | Installing Ansible | Understanding Roles | Roles Reusability | Variables | Templates | Ansible on AWS Cloud - Configuring Ansible, Provisioning AWS Resources using Ansible.

Real Time Monitoring

Prometheus - What is Monitoring | Why Monitoring | What is Prometheus | Why Prometheus | Use Cases | Installing Prometheus | Setting up Prometheus | Architecture of Prometheus | Prometheus Server | Scraping Metrics | Storing Metrics.

Grafana - What is Grafana | Why Grafana | Use Cases | Installing Grafana | Setting up Grafana | Querying Prometheus Metrics | Creating Prometheus data source | Creating Visualization | Creating Graphs.

Monitoring on AWS Cloud - Introduction to Monitoring on Cloud | Introduction to AWS Cloud Watch | Cloud Watch Metrics | Cloud Watch Alarms | Monitoring EC2 | Monitoring S3 | Custom Metrics | Integrated Dashboard.

ELK (ElasticSearch LogStash Kibana) - What is ELK | What is ElasticSearch | What is LogStash | What is Kibana | History | Use Cases | Analyze Metric using ElasticSearch | Collect Logs using LogStash | Visualize and Query Metrics using Kibana | ELK on AWS Cloud - Elastic Cloud Stack.

8 + Industry-oriented Case Studies

CI/CD Pipeline using Jenkins

Build a complete CI/CD pipeline with Jenkins, GitHub, Maven, SonarQube, & AWS deployment via Ansible.

Jenkins

Deployment on Docker

Containerize apps using Docker, manage with Compose, and deploy to AWS ECS and Fargate.

Docker

Scalability on Kubernetes

Deploy scalable apps on Kubernetes with autoscaling, traffic routing, and high availability via EKS.

Kubernetes

Ansible Resource Management

Automate server config and deployments on AWS EC2 using Ansible playbooks and role-based workflows.

Ansible

Monitoring Resource With Prometheus

Monitor AWS and Kubernetes metrics using Prometheus and set alerts with Alertmanager & CloudWatch.

Prometheus

Terraforming Infrastructure

Automate AWS infrastructure with Terraform, managing VPCs, EC2, IAM, RDS, & S3.

Infrastructure

File Management in Linux

Master Linux file operations, permissions, shell scripting, & secure file transfers.

Linux

Auto Infrastructure Deployment

Integrate Terraform, CloudFormation, & Ansible for dynamic & event-driven AWS provisioning.

Infrastructure

Dashboarding with Grafana

Create Grafana dashboards for real-time insights from Prometheus, CloudWatch, & log data.

Infrastructure

What will be your **learning platform**?

WingZ, our dedicated one-stop learning platform for doubt resolution, mentor sessions, interview updates, learning journey tracker and overall growth.

WINGZ Your All-in-one Career Launchpad

Self Learning Hub

Access 24/7 learning resources, recorded sessions, & materials at your convenience.

Track Your Daily Progress

Monitor your learning milestones & stay aligned with your course goals.

Every Lecture is just a Replay away

Missed a session? Revisit every lecture anytime with easy replay access.

Live Expert Sessions

Attend live sessions with industry professionals for real-time insights & Q&A.

AI - Powered Test series

Challenge yourself with smart, adaptive tests designed to track and boost your progress.

One click Job Application

Apply to relevant job openings instantly with a single click through the portal.

Our Happy Learners...

Vikas Reddy

I opted for masters in **AWS and Azure Cloud** technology in Bangalore. The coaching here is awesome, teachers are very friendly and the environment here in the institute is very good. It's quite differently built education system here with just 20 students per batch. Definitely worth a try to get a better future.

Thyagarajan Kesavan

Best place for learning **AWS & Azure** course training in Chennai. It is only place for practical training with awesome trainers.

Sanjana Singaraju

I had a great learning experience at Itvedant! The courses are well-structured, and the trainers explain concepts in a way that's easy to understand. The hands-on approach and real-world projects helped me gain practical knowledge, which boosted my confidence. The faculty is supportive and always ready to clear doubts. The placement assistance is also a big plus. I highly recommend Itvedant to anyone looking to upskill in IT and software development!

Ankita Alandikar

I had a great experience with the ItVedant. The trainers are very knowledgeable and friendly. They explain all the topics in a simple way, and they are always ready to clear doubts. The classes are well-structured and easy to follow. The placement support is excellent. They help with resume building, conduct mock interviews, and give tips to improve communication skills and confidence. They also bring many job opportunities from good companies, and guide you through the entire placement process.

Sanjai Eswar R

I enrolled in masters in **AWS and Azure**. It's good place for learning new things. Manager is friendly nature. They will guide you in right way for your career. Now I got placed in First American India (Bangalore) as Technical Trainee.

Sahil Gharat

The IT Vedant course provides an exceptional combination of theoretical knowledge and practical expertise, tailored specifically for individuals passionate about technology. Utilizing the expertise of seasoned instructors and encompassing a comprehensive curriculum, students acquire a robust foundation in the intricacies of IT concepts. The course's structured approach ensures that even complex topics are effectively accessible to learners. This comprehensive program is highly recommended for aspiring professionals seeking to advance their careers in the technology industry.

Shubham Dongarwar

B.Tech in Computer Science & Engineering

Placed as Solution Architect at Co-5

I joined this Program at Itvedant, and though I was new to cloud computing, the practical learning helped me a lot. The hands-on projects were top-notch & gave me a real feel of a production environment.

Coming from a development background, this course helped bridge the gap and made the learning easier and impactful.

The constant support from the faculty made the entire journey smooth and confidence-boosting.
