

Full Stack Development

Enhanced with AI

From The

Director's Desk...

A Degree is no longer a certificate of knowledge. Students and colleges often complain about not having enough jobs in the market. On the other hand, companies lack sufficient manpower. This means there are tons of jobs for everyone, but what lacks is the skills and knowledge to grab these opportunities. We understood this problem in 2012 and started "Itvedant" to bridge the gap.

Itvedant has 3 teams, where one team works closely with companies, understanding their requirements and analysing the most in-demand skills. Their inputs and feedback are passed on to the second team, which develops the syllabus and guides students to choose courses as per their calibre and interest. The third team trains the candidates as per industry standards, while continuously monitoring their progress. Itvedant promises utmost care and efforts for each and every student and in turn, expects them to give their 100% for an optimal outcome.

Once you learn to apply your technical know-how to solve real-world problems. You are just one interview away from your dream job. We would like to wish you success in your journey to becoming a gem of the IT industry. This industry needs some smart and innovative people like you. As Directors, we don't just lead the organisation ; we carry the dreams of every learner who walks through our doors. And we promise to stand by your side until those dreams turn into reality.

COURSE CURRICULUM

FRONTEND

HTML 5

Weaving the World Wide Web | Introduction to WWW | Client-Server Architecture | HTML Structure - Head, Body, and HTML Version | HTML Comments | Page Information - title, meta, link, style, script | HTML Tags and Attributes | First Web Page - Hello World | Text Formatting Tags | Block Elements | Document Structure | Format Tags | Image Tag | Anchor Tag | Lists | HTML Structures | Table Structure | HTML5 Forms | HTML Semantic Elements | Audio, Video Tag

CSS 3

Need and Types of CSS | Comments in CSS | Introduction to Selectors | Tag, ID, and Class Selectors | Combinator Selector | Pseudo-class Selectors | Pseudo-elements Selectors | Attribute Selectors | Unlocking Creative Toolbox (CSS Properties) | Text Properties | Custom Font Family | CSS Unit Types - Color and Size | Box Properties | Border Properties | Margin and Padding | Shadow Properties - Text and Box | Background Properties | Float and Clear | Position Properties | Display Properties | Responsive Utilities | What is a Responsive Page? | Meta Viewport | Media Queries | Responsive Images | Flexbox Layout | Grid Layout

JavaScript

Introduction to JavaScript | JavaScript History and Features | Types of JS | Print Hello World | Comments | var, let, and const | Keywords | Scopes | Variable Hoisting | Data Types | Operators | Conditional and Control Statements | Conditional Statements | Looping | JavaScript Functions | Built-in Functions | Regular Functions | Passing Parameters to Function | return Value | Anonymous Functions

Bootstrap

Bootstrap Introduction | Layout and Content | Bootstrap Components | Accordians | Alerts | Badges | Breadcrumb | Button Group | Card | Carousel | List group | Modal | Navbar | Navs and Tabs | Pagination | Placeholders | Popovers | Progress | Scrollspy | Spinners | Toasts | Tooltips | Bootstrap Utilities | Bootstrap Icons | Layouts and Grids | CSS Grids | Forms | Form Control | Select | Checks and Radios | Range | Input Group | Floating Labels | Form Validation

Advanced JavaScript

Arrow Functions | JS Objects & "this" | Nested Objects | Arrays | String & Math Objects | Window & Document Objects | DOM Basics | Access & Manipulate Elements | Event Handling (click, submit, etc.) | Event Propagation | Modern JS: Template Strings, Destructuring, Rest/Spread | Callbacks, Promises, Async/Await | Fetch API | Project: Currency Converter

React

ReactJS Features | Adding React to Existing Site | JSX & Dynamic Variables | Depreciated | Function Components & Props | Counter App | Conditional Rendering (Short Circuit, Ternary) | State & Props | Component | Lifecycle | Side-Effects & Cleanup | useEffect | React Router v6 | Routing Setup | Configuring & Linking Routes | Nested, Index, 404 Pages | URL & Query Params | Navigation | Forms in React | Controlled vs Uncontrolled Inputs | Handling Multiple Fields & Submit | Context & Reducers | Context API | Creating & Using Context | Custom Hooks | Reducers | Error Handling | Debugging | Memoization | React.memo & PureComponent | Build & Deploy | Production Build | Deployment via Vercel/Netlify

★ Angular

Angular Components | Creating & Styling Components | Component Metadata & Modules | Lifecycle Hooks | Standalone Components | Data Binding | String Interpolation | Event, Property & Two-Way Binding | Directives | *ngIf, *ngFor, *ngSwitch, ng-container | Pipes | Strong Typing | Interfaces & Classes | Encapsulation | Data Transformation | Component Communication | Nested Components | @Input & @Output | Services & Dependency Injection | Data Sharing via Services | RxJS Basics | HTTP Requests & Error Handling | Routing | Basic & Advanced Routing | Route Params & Nested Routes | Route Guards | Lazy Loading | Angular Forms | Template-Driven & Reactive Forms | Validation Techniques | Angular Signals | Signal Basics & Value Management | Deferrable Views | CLI Tools | Angular CLI | Routing Setup | Deployment

DATABASE

SQL (Structured Query Language)

SQL Setup & Basics | ER Modeling & Diagram Conversion | Normalization & Keys | SQL Fundamentals | Data Types, Expressions, Operators, Constraints | Table Operations | Create, Alter, Drop, Index Tables | Querying Data | SELECT, WHERE, Operators, ORDER BY, LIMIT, DISTINCT, IS NULL, CASE | Data Manipulation | INSERT, UPDATE, DELETE | SQL Functions | String, Math, Date, Aggregate, GROUP BY, HAVING | Subqueries & Joins | Subqueries (Single/Multiple) | Cross, Inner, Natural, Outer, Self Joins, Equi vs Non-Equi | Views | Types of Views, DML via Views | Procedural SQL | Stored Procedures, Variables, Conditionals, Loops, FunctionsTriggers | Row-Level, Before, After"

★ MongoDB

Introduction to MongoDB | Difference Between SQL and NoSQL | What is MongoDB? | Installing MongoDB on Local Machine | Using MongoDB Shell | CRUD Using MongoDB | Data Types in MongoDB | Performing CRUD Operations in MongoDB | Finding Documents | Using Projection to Get Required Fields from Collection | Various MongoDB Operators (\$sort, \$limit, \$set, etc.) | Aggregates in MongoDB Queries | MongoDB Atlas & MongoDB Compass | Introduction to MongoDB Atlas for Remote Databases | Installing MongoDB Compass to Perform CRUD in Local and Remote Databases

BACKEND

Java Programming

Java Features | JVM & Bytecode | Installation | Data Types, Variables, Type Casting, Comments | Operators (Arithmetic to Unary) | Conditional & Looping (if, switch, for, while, do-while) | Arrays | Classes & Objects | Methods, Constructors, var-args | Modifiers | Garbage Collection | Object Class | Packages | Importing | Built-in & User-Defined Packages | Nested & Anonymous Classes | OOP | Inheritance, Overriding, Overloading | Abstract Classes | Interfaces | Polymorphism | String Handling | String Functions, StringBuffer & StringBuilder | Java Time API | Exception Handling | try-catch-finally, throw & throws, User-Defined Exceptions | JDBC | Drivers, Connections, Statements, ResultSetCollections | List, Set, Queue, Stack, Map | Iterators | Generics | Wrapper Classes | Java 8 | Lambda, Functional Interfaces, forEach, Method References, Streams | Multithreading | Thread Lifecycle | Thread vs Runnable | Synchronization | Daemon Threads"

Spring Boot 3.0

Spring Boot Architecture | Request-Response Cycle | Project Setup with Spring Initializer & Maven | Running via Command Line & STS 4 | Core & MVC | IoC Container | @Component, @Bean | Dependency Injection | DevTools | @Controller, @RequestMapping | Creating REST APIs | Service Layer, CRUD | REST Validation (@Valid, Custom) | Postman Testing | Session Management (Stateful vs Stateless) | HttpSession, @SessionScope, Redis | Security Integration | JWT, Cookie-Based Auth | CSRF, XSS Prevention | Role-Based Access | OAuth2 Login | API Security Practices | File Uploads & Downloads | Local vs Cloud Storage | File Type Restriction | DB File Storage (BLOB) | Database & JPA | MySQL Setup | JPA Annotations | CRUD with Repository | Custom Queries | JPA Auditing | Pagination & Sorting | Entity Relationships (OneToOne, OneToMany, ManyToMany) | Projections | API Consumption with Relationships | Spring Boot + React Integration

POSTMAN

*Java, Springboot will be covered in Instructor led Online in Python Full Stack Track.

★ Software Testing

The Essentials of Software Testing | What is software testing? | Importance of testing in software development | Types of testing (Unit, Integration, System, Acceptance) | Mastering Unit Testing with JUnit | Introduction to JUnit framework | Writing your first JUnit test case | Seamless Integration Testing | Writing integration tests using Junit

Python Programming

Introduction to Python | What is Python? | Features & Installation | Variables | print() Function | Comments | Data & Operators | Basic Data Types (Number, String, Boolean) | type() | Arithmetic, Assignment, Comparison, Logical Operators | input() | Type Conversions | Conditional Statements & Loops | if...else, elif | Indentation | range() | for, while Loops | continue, break, pass | Nested Loops | Data Structures | String, Datetime | List & Comprehensions | Multidimensional Lists | Tuple | Set | Dictionary | Functions & Scope | Defining & Calling Functions | return Statement | Argument Types | Scope (Global vs. Local) | Recursion | lambda, filter(), map(), reduce() | Modules & Packages | What is a Module? | Built-in & User-defined Modules | Packages | Object-Oriented Programming (OOP) | Introduction | Classes & Objects | Methods, Attributes | Constructor & Destructor | Inheritance | Abstraction & Encapsulation | Exception Handling | try, except, finally

Django

Architecture & Setup | MVT Overview | Create Project & App | Models | Fields, Relationships, Validations | Migrations | User & Pet Models | Views & URLs | FBV vs CBV | CRUD with Views | URL Routing | Templates & Static | Template Basics | Tags, Filters, Inheritance | Static Files | Admin & Uploads | Superuser | Admin Customization | File Uploads | Auth & Sessions | User Auth | Permissions | CSRF | Sessions | E-commerce | Cart & Order | Payment Integration | Custom Queries | Emails & OTP | Deployment | PythonAnywhere | APIs & React | Django REST Framework | Serializers | CRUD | React Integration

django

**Python Django will be covered in Instructor led Online in Java Full Stack Track*

★ CLOUD DEPLOYMENT

AWS Dev Ops

Cloud Basics | Intro to AWS & Cost Management | IAM Overview | Users, Groups, Roles & Policies | EC2 Essentials | Pricing, Launch, and Autoscaling | Load Balancers & Traffic Routing | Modern Cloud Architectures | Monitoring with CloudWatch | Storage: S3, EBS | Databases: RDS, DynamoDB | Networking: VPC, Gateways, Route 53, CloudFront | DevOps Intro | Linux Basics & Shell Scripting | Docker: Basics, Commands, Storage | Kubernetes: Pods, Deployments, Storage | AWS DevOps: CI/CD Automation with AWS Tools

Projects & Case Studies

InfoMedia: Wikipedia-Style UI

Build an elegant and structured informational website with a clean, Wikipedia-like interface.

HTML & CSS

ForexFlow: Currency Converter

Create a seamless currency conversion web app with real-time exchange rate updates.

HTML, CSS & JavaScript

AnimeVerse: OTT UI Design

Design a visually appealing Anime OTT platform UI using Bootstrap for a modern user experience.

BOOTSTRAP

Blogshelf Creating & Managing Blog

Develop a task management app similar to a to-do list, helping users stay organized efficiently.

REACTJS

RideTrack: Cab Booking Analytics

An end-to-end case study covering database design, advanced SQL queries, and analytics for cab services.

SQL

QuizPro: Console-Based Trivia

A fun and interactive console-based MCQ quiz game designed using Python.

PYTHON / JAVA

BankEase: Console Banking System

Develop a console-based banking application using OOP concepts for account management and transactions using Java

PYTHON / JAVA - OOPS

PetStore: Online Pet Store

Create a full-stack eCommerce platform for pet products and services using Django.

DJANGO / SPRING BOOT

Dish Diary: Recipe Manager

A CRUD-based web app for storing, managing, and sharing food recipes dynamically.

ANGULAR

FoodHub: Online Food Ordering System

An end-to-end database case study covering order management, customer tracking, and restaurant insights.

SQL

CineDB: Movie Database System

Design and analyze a complete movie database, implementing advanced SQL operations and queries.

SQL

BankVault: Simple Banking Application

Develop an end-to-end database system for banking operations, covering transactions and account management.

SQL

FotoCloud: Stock Media Hub

A React-based stock media website for displays high-quality images

REACTJS

JewelLuxe: Jewellery Inventory System

A CRUD-based jewellery management platform to track inventory

DJANGO/SPRING BOOT

ChatEase: AI Chatbot

Integrate ChatGPT API to create an interactive and intelligent chatbot for instant conversations.

JAVASCRIPT

WordQuest: Console Word Guessing Game

A fun and engaging console-based word guessing game built with Python.

PYTHON/JAVA

My Journey To Success...

Dhanashree
Lohar

B.E. Computer Science

**Full Stack
Developer**

Scan for Video

My name is Dhanashree Lohar, and I would like to share my amazing experience with Itvedant's Python Web Development program. Itvedant exceeded my expectations with their well-structured curriculum and knowledgeable instructors. Each session was clear, detailed, and easy to follow, making my learning journey smooth and enjoyable. The instructors were not only skilled but also supportive throughout the course. Their guidance played a big role in helping me build a strong foundation in Python web development. I was able to grasp the concepts quickly and apply them effectively. Itvedant gave me both the skills and the confidence I needed to move ahead in my career. I truly appreciate the effort and quality they put into the program. Thank you, Itvedant!

Jignasa
Dcosta

BMS

**Full Stack
Developer**

Scan for Video

I'm Jignasa Dcosta, and I've completed my Full Stack Development with Python course from Itvedant, Borivali. My journey began as a Graphic Designer; I pursued Graphic Design here at Itvedant. Later, I transitioned into UX Designing, and that's where my curiosity about how websites and applications work on the backend started to grow. Coming from a non-IT background, I was a bit worried about how I could transition into the tech field. And that is where Itvedant truly helped me. Their course is very well-structured, and the faculty members are extremely supportive. I've gained so much confidence that I now feel transitioning into the IT field is absolutely achievable for me. Thank you so much Itvedant!

Our Happy Learners...

Pranay Moon
(B.E)

Itvedant is one of the best institute to learn and polish your coding knowledge and skills. The faculty is very supportive and always there to help with your doubts. Itvedant not only provides you the coding skills but they also make sure to improve your communication skills and overall confidence through various activities moreover there all help in profile building and guides and prepares you for the interview.

Wafa Sayed
(Bsc. IT)

Overall, the institute provides a good platform for improving technical skills. The curriculum is well-structured, and the teaching approach is practical and industry-oriented. It has been beneficial for enhancing my knowledge in technologies like Java, Spring Boot, React, and Angular. The hands-on projects and support from the instructors make the learning process effective. A great choice for those looking to build a strong foundation in tech.

Mradul Bais
(B.Tech)

Explanations of complex subjects like building python with Django and managing databases with SQL were clear and very helpful. This made it easier to grasp the intricacies of full-stack development. Coming to Practical They allowed us to apply the theoretical knowledge in a practical setting, reinforcing our learning. Interactive Coding Sessions proved beneficial to integrate more live coding sessions during the lectures. Following along with your coding in real-time would help solidify the concepts.

Berslin Solomon
(B.E)

I recently completed the Master in full stack web development in java at Itvedant, and overall, my experience was very positive. The course provided an in-depth understanding of the java, with content that was both relevant and well-structured. Hari sir's deep knowledge and engaging teaching style made complex concepts accessible and enjoyable to learn. Hari sir was always approachable, willing to answer questions, and provided insightful feedback on assignments.

Samiya Sardar
(Bsc. IT)

I have joined It vedant for the course of full stack java. The faculty plus the training staff are very well versed in the subject. The constant assignments and assessment helps me to understand the course more clearly and in detail. The trainers and faculty are very kind and polite and always ready to help solve any doubts .

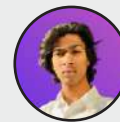

Tanvi Varpe
(B.E)

I've had a very good experience at IT Vedant during my Full Stack In Java Course. The way all the concepts are explained to us by mentor Aditya Sir. He has a very good knowledge of the industry and the technology. I would recommend IT Vedant for upskilling and for pushing us at being the best in the industry.

Prasath V
(B.Com)

I've enrolled in the Full Stack Development with Python course at IT Vedant E-Class and found it to be an incredible learning experience. The curriculum is very well-structured, and the trainers are highly knowledgeable. They break down even complex concepts into simple, understandable lessons. Overall, my experience has been very rewarding, and I feel much more confident about building a strong foundation in Full Stack Development.

Rohit Gudse
(B.Com)

I had a great experience at Itvedant Institute while pursuing the Full Stack Web Development in Java course. The curriculum is well-structured and provides in-depth knowledge of both front-end and back-end development. The teachers and coordinators are very supportive and always ready to help with any problems we face during the course. Their guidance made learning smooth and effective. The institute also offers good placement assistance, helping students prepare for job opportunities. Overall, Itvedant is a great place to learn and grow as a developer. Highly recommended!
