

Software Testing

With AI

From The

Director's Desk...

Degree is no longer the certificate of knowledge. Students and colleges often complain about not having enough jobs in the market. On the other hand, companies lack sufficient manpower. This means there are tons of jobs for everyone but what lacks is the skills and knowledge to grab these opportunities. We understood this problem in 2012 and started "Itvedant" to bridge the gap.

Itvedant has 3 teams, where one team works closely with companies, understanding their requirements and analyzing the most in-demand skills. Their inputs and feedback are passed on to the second team which develops the syllabus and guides students to choose courses as per their calibre and interest. The third team trains the candidates as per industry standards, while continuously monitoring their progress. Itvedant promises utmost care and efforts for each and every student and in turn, expects them to give their 100%, for an optimal outcome.

Once you learn to apply your technical know-how to solve real-world problems. You are just one interview away from your dream job. We would like to wish you success in your journey to becoming a gem of the IT industry. This industry needs some smart and innovative people like you. As Directors, we don't just lead the organization; we carry the dreams of every learner who walks through our doors. And we promise to stand by your side until those dreams turn into reality.

COURSE CURRICULUM

Manual Testing Fundamentals

(3.8 weeks)

Manual Testing Fundamentals | Software Testing Basics | Importance of Testing | QA vs QC vs Testing | SDLC vs STLC | Testing Types | Functional Testing | Non-Functional Testing | Smoke | Sanity | Regression | Alpha | Beta | Acceptance Testing | System Testing | Integration Testing | Testing Techniques | Black Box | White Box | Equivalence Partitioning | Boundary Value Analysis | Decision Table | State Transition | Test Documentation & Traceability | ADD | BRD | FRD | Test Plan | Test Strategy | Test Scenario vs Test Case | RTM (Requirement Traceability Matrix) | Defect Management | Bug Life Cycle | Severity vs Priority | Defect Reporting | Bug Tracking | Agile Basics | Agile Manifesto | Agile Principles | Scrum Framework | Sprint Planning | Sprint Retrospective | Testing in Agile | JIRA for Testers | Creating Stories | Tasks | Bugs | Sprint Board | Backlogs | Test Case Management

Programming Essentials for QA

(4 weeks)

Programming Essentials for QA | SQL for Testers | Database Basics | DDL & DML Commands | Joins | Aggregates | Data Validation with SQL | HTML Basics | HTML Tags | Forms | Input Fields | Tables | Webpage UI Testing | Java Basics | Data Types | Variables | Operators | Loops | Conditionals | Arrays | Strings | OOPs in Java | Classes & Objects | Inheritance | Polymorphism | Encapsulation | Abstraction | Java for QA | Exception Handling | File Handling | Git & GitHub | Version Control Concepts | Clone | Commit | Push | Pull | Branching | Merging

Test Automation with Selenium

(3.6 weeks)

Test Automation with Selenium | Introduction to Automation & Selenium | Selenium IDE, WebDriver, Grid | Environment Setup | Selenium WebDriver Basics | Locators – ID, Name, XPath, CSS | WebElement Operations | Waits and Handling | Implicit, Explicit, Fluent Waits | Alerts, Frames, Windows | TestNG Integration | Annotations, Assertions, Reporting | Maven Setup | Project Structure, POM.xml | Framework Design | Page Object Model, Utilities, Config | Reporting & Logging | Log4j, Extent Reports | Introduction to Cucumber | Gherkin Syntax, Feature Files | Step Definitions | Step Code, Hooks, Tags | Cucumber + Selenium | Test Execution with TestNG, BDD Reporting

API Testing (1.2 weeks)

API Testing | API Testing with Postman | HTTP Methods (GET, POST, PUT, DELETE) | Headers, Parameters, and Body | Request & Response Structure | Writing Assertions in Postman | Validating Response Body, Status Codes | Testing with Different Content Types (JSON, XML) | Using Environment Variables | Global, Local, and Collection Variables | Collection Runner for Batch Testing | API Automation with Rest Assured | Setup & Configuration | Dependencies & Libraries | Writing GET, POST, PUT, DELETE Tests | Validating Response Codes | Response Body Validation | Extracting Data from Response | Handling Authentication (Basic, OAuth) | Using Path and Query Parameters | Logging and Debugging API Requests | Error Handling and Assertions in Rest Assured

DevOps & AI in Testing (2.8 weeks)

DevOps & AI in Testing | Jenkins for QA | Jenkins Setup & Configuration | CI/CD Pipeline Concepts | Integrating Jenkins with QA | Running Tests from Jenkins | Scheduling Jobs | Monitoring and Reporting | DevOps for QA | DevOps Lifecycle Overview | Role of QA in CI/CD | Continuous Testing | DevOps Toolchain for QA | Tools & Integration | Jenkins Automation Pipelines | Version Control Integration (Git) | Test Automation in CI/CD | AI in Testing | AI for Test Case Generation | Scriptless Testing Tools Overview (Testim) | AI in Regression Testing | Test Optimization with AI | AI in Test Execution, Bug Detection | Predictive Analytics in Testing

ISTQB Global Certification (1 week)

Fundamentals of Testng | Testing throughout the SDLC | Static Testing Exam | Test Analysis & Design | Managing The Test Activities | Test Tools | Preparation: Mock Questions & Discussions

IBM Certification (Certification Offered on IBM skill network)

Introduction to Testing | Introduction to Test Driven Development | Advanced Methods for Test Driven Development | Introduction to Behavior-Driven Development | Running Behave for Behavior Driven Development.

Projects & Case Studies

Manual Testing of an E-Commerce Website

Prepare test plan, write scenarios/cases, execute tests, log bugs in JIRA, submit test summary report.

JIRA & EXCEL

Sprint-Based Testing with JIRA

Create user stories, bugs, tasks; manage sprints; execute test cycle with retrospectives.

KANBAN & AGILE METHODOLOGY

HRMS Application – Backend & Data Testing

Validate DB records using SQL; test joins/views

SQL

Git & Jenkins Integration Demo

Push test code to GitHub; configure Jenkins pipeline for build and test execution.

GIT & JENKINS

Automation of User Registration & Login Flow

Automate using Selenium + TestNG + Maven; handle waits, validations, and generate reports.

Selenium, TestNG & Maven

ERP System Automation Framework

Design POM-based framework; implement config utilities, logs, and reports.

Maven

API Testing for Registration/Login

Validate login/register APIs using Postman; automate with Rest Assured and validate response bodies.

Postman & Rest Assured

E-Commerce Checkout BDD Framework

Write feature files, step defs; execute tests with TestNG + Cucumber + Selenium.

Cucumber, TestNG, Selenium

Web Testing using AI Tools

Use Playwright to generate self-healing test scripts and run visual regression.

Playwright

Test Data Generator with Java

Build utility to create test data (CSV), use loops, file I/O, exception handling.

JAVA

ChatGPT-powered Test Case Generator

Use LLM prompts to auto-generate test cases from stories or requirements.

ChatGPT

API Testing for Transaction

Test APIs for fund transfer, balance inquiry & transaction retrieval

My Journey To Success...

*Dhanashree
Lohar*

B.E. Computer Science

Scan for Video

My name is Dhanashree Lohar, and I would like to share my amazing experience with Itvedant's. Itvedant exceeded my expectations with their well-structured curriculum and knowledgeable instructors. Each session was clear, detailed, and easy to follow, making my learning journey smooth and enjoyable. The instructors were not only skilled but also supportive throughout the course. Their guidance played a big role in helping me build a strong foundation in Python web development. I was able to grasp the concepts quickly and apply them effectively. Itvedant gave me both the skills and the confidence I needed to move ahead in my career. I truly appreciate the effort and quality they put into the program. Thank you, Itvedant !

*Jignasa
Dcosta*

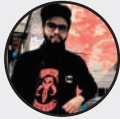

BMS

Scan for Video

I'm Jignasa Dcosta, and I've completed my course from Itvedant. My curiosity about how websites and applications work on the backend started to grow. Coming from a non-IT background, I was a bit worried about how I could transition into the tech field. And that is where Itvedant truly helped me. Their course is very well-structured, and the faculty members are extremely supportive. I've gained so much confidence that I now feel transitioning into the IT field is absolutely achievable for me. Thank you so much Itvedant!

Our Happy Learners...

Pranay Moon
(B.E)

Itvedant is one of the best institute to learn and polish your coding knowledge and skills. The faculty is very supportive and always there to help with your doubts. Itvedant not only provides you the coding skills but they also make sure to improve your communication skills and overall confidence through various activities moreover there all help in profile building and guides and prepares you for the interview.

Wafa Sayed
(Bsc. IT)

Overall, the institute provides a good platform for improving technical skills. The curriculum is well-structured, and the teaching approach is practical and industry-oriented. It has been beneficial for enhancing my knowledge in technologies like Java, Spring Boot, React, and Angular. The hands-on projects and support from the instructors make the learning process effective. A great choice for those looking to build a strong foundation in tech.

Mradul Bais
(B.Tech)

Explanations of complex subjects like building python with Django and managing databases with SQL were clear and very helpful. This made it easier to grasp the intricacies of full-stack development. Coming to Practical They allowed us to apply the theoretical knowledge in a practical setting, reinforcing our learning. Interactive Coding Sessions proved beneficial to integrate more live coding sessions during the lectures. Following along with your coding in real-time would help solidify the concepts.

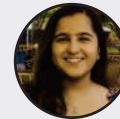

Berslin Solomon
(B.E)

I recently completed the Master in full stack web development in java at Itvedant, and overall, my experience was very positive. The course provided an in-depth understanding of the java, with content that was both relevant and well-structured. Hari sir's deep knowledge and engaging teaching style made complex concepts accessible and enjoyable to learn. Hari sir was always approachable, willing to answer questions, and provided insightful feedback on assignments.

Samiya Sardar
(Bsc. IT)

I have joined It vedant for the course of full stack java. The faculty plus the training staff are very well versed in the subject. The constant assignments and assessment helps me to understand the course more clearly and in detail. The trainers and faculty are very kind and polite and always ready to help solve any doubts .

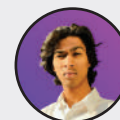

Tanvi Varpe
(B.E)

I've had a very good experience at IT Vedant during my Full Stack In Java Course. The way all the concepts are explained to us by mentor Aditya Sir. He has a very good knowledge of the industry and the technology. I would recommend IT Vedant for upskilling and for pushing us at being the best in the industry.

Prasath V
(B.Com)

I've enrolled in the Full Stack Development with Python course at IT Vedant E-Class and found it to be an incredible learning experience. The curriculum is very well-structured, and the trainers are highly knowledgeable. They break down even complex concepts into simple, understandable lessons. Overall, my experience has been very rewarding, and I feel much more confident about building a strong foundation in Full Stack Development.

Rohit Gudse
(B.Com)

I had a great experience at Itvedant Institute while pursuing the Full Stack Web Development in Java course. The curriculum is well-structured and provides in-depth knowledge of both front-end and back-end development. The teachers and coordinators are very supportive and always ready to help with any problems we face during the course. Their guidance made learning smooth and effective. The institute also offers good placement assistance, helping students prepare for job opportunities. Overall, Itvedant is a great place to learn and grow as a developer. Highly recommended!
