

It's time to give wings to your career in

DATA SCIENCE & ANALYTICS WITH AI

From The

Director's Desk...

A Degree is no longer a certificate of knowledge. Students and colleges often complain about not having enough jobs in the market. On the other hand, companies lack sufficient manpower. This means there are tons of jobs for everyone, but what lacks is the skills and knowledge to grab these opportunities. We understood this problem in 2012 and started "Itvedant" to bridge the gap.

Itvedant has 3 teams, where one team works closely with companies, understanding their requirements and analysing the most in-demand skills. Their inputs and feedback are passed on to the second team, which develops the syllabus and guides students to choose courses as per their calibre and interest. The third team trains the candidates as per industry standards, while continuously monitoring their progress. Itvedant promises utmost care and efforts for each and every student and in turn, expects them to give their 100% for an optimal outcome.

Once you learn to apply your technical know-how to solve real-world problems. You are just one interview away from your dream job. We would like to wish you success in your journey to becoming a gem of the IT industry. This industry needs some smart and innovative people like you. As Directors, we don't just lead the organisation ; we carry the dreams of every learner who walks through our doors. And we promise to stand by your side until those dreams turn into reality.

PLACEMENTS

LEARN 360°

Gain full access to all courses for an entire year. Learn subjects from different courses, revisit concepts, and upskill across multiple domains.

80:20 APPROACH

Our 80 Practical : 20 Theory model equips students with rich industry-oriented practical knowledge

CAREER COACH

Personalized career coach assigned to each student for maximum guidance and support

24 X 7 LEARNING

Learn from best of both the worlds - from Corporate Gurus in classrooms to 24x7 Digital Learning Library

WINGZ PORTAL

From lecture schedule to companies approaching you - a dedicated student web portal to give wings to your career

1:1 DOUBT SOLVING

Afraid to ask any doubt in the classroom or group? The 1:1 doubt solving ensures every silly doubt will be resolved

PAN INDIA PLACEMENTS

Our dedicated placement cell makes sure you receive maximum interview call till the time you get placed

MULTI DOMAIN INTERVIEWS

Explore interview calls across various industries and roles to widen your career possibilities and match your skillset with the best opportunities.

INTEGRATED INTERNSHIP

Get an internship certificate from exclusive tie-up companies even before your course completion

EXPERT CRAFTED RESUME

Your resume, your brand. Get it professionally crafted by industry resume experts to make a lasting impression on recruiters.

GLOBAL CERTIFICATION

Global certifications from IBM & AWS along with Itvedant module completion certificates

ALUMNI NETWORK

Connect with a nationwide alumni community for mentorship, networking, and exclusive job referrals from across the country.

COURSE CURRICULUM

DIVING IN THE WORLD OF DATA

Statistical Analysis

Introduction to Data Science & Data Types | Applications Across Fields | Statistics & Probability | Central Tendency & Dispersion | Association & Skewness | Probability Basics | Distributions: Uniform, Binomial, Normal | Sampling Techniques | Hypothesis Testing | Central Limit Theorem | P-values & Errors | Data Collection & Cleaning

Advanced Excel

Interface | Navigation | Data Entry | Formatting | Cut, Copy, Paste | Undo/Redo | Find & Replace | AutoSum | Common Functions | Date & Text Functions | Relative & Absolute References | Named Ranges | Tables | AutoFill | Data Validation | Conditional Formatting | Custom Number Formats | IF, AND, OR | SUMIF, COUNTIF | VLOOKUP, HLOOKUP | INDEX, MATCH | PivotTables | Charts | Sparklines | Trendline

DATABASE

SQL

SQL Setup & Basics | ER Modeling & Diagram Conversion | Normalization & Keys | SQL Fundamentals | Data Types, Expressions, Operators, Constraints | Table Operations | Create, Alter, Drop, Index Tables | Querying Data | SELECT, WHERE, Operators, ORDER BY, LIMIT, DISTINCT, IS NULL, CASE | Data Manipulation | INSERT, UPDATE, DELETE | SQL Functions | String, Math, Date, Aggregate, GROUP BY, HAVING | Subqueries & Joins | Subqueries (Single/Multiple) | Cross, Inner, Natural, Outer, Self Joins, Equi vs Non-Equi | Views | Types of Views, DML via Views

DATA VISUALIZATION

Microsoft PowerBI

Power BI Overview | Self-Service BI | Benefits & Components | Architecture & Flow | Power BI Roles | ETL & ELT | Installing Power BI Desktop | Connecting to Data Sources | Query Editor | Cleaning & Transforming Data | Merging & Appending | Editing & Splitting Columns | Changing Data Types | Adding Columns | Modeling | Star & Snowflake Schemas | Data Relationships | Views in Power BI | DAX Basics | M Query vs DAX | Measures & Calculations | Aggregations | Text, Date & Time Functions | Time Intelligence | Filter Functions | CALCULATE | IF & SWITCH | Visualizations | Charts, Tables & Maps | Gauges, Cards & KPIs | Formatting & Custom Visuals | Shapes, Text & Images Dashboards & Insights | Slicers & Filters | Q&A | Smart Narrative | Decomposition Tree | Key Influencers | Power BI Service | app.powerbi.com | Scheduled Refresh | PowerPoint Export | Gateways | DirectQuery & Live Connection | SQL Server Integration

Tableau

Introduction to Tableau | Tableau Architecture & Products | Shelves: Row, Column, Page, Filter, Mark | Data Types: Measures, Dimensions | Discrete vs Continuous | Measure Names & Values | Calculated Fields & Parameters | Connecting to Data | Data Extracts vs Live | Excel, CSV, SQL Server | Joins, Blends, Unions | Data Preparation | Sorting | Filters | Groups, Sets, Hierarchies | Charts: Bar, Line, Scatter, Heat Maps, Tree Maps, Histograms, Bullet, Box Plots | Custom Charts: Lollipop, Pareto, Dual Combo, Motion | KPIs | Analytics Tools | Reference Lines, Bands, Distributions | Trend Lines & Models | Forecasting | Statistical Summary | Dashboards | Building & Designing Dashboards | Dashboard Objects | Drill-Down Reports | Visual Best Practices | Action Filters (URL, Highlight, Parameter, etc.) | Publishing & Sharing

DATA ANALYSIS

Python Programming

Features & Applications | Installing & Setting Up | Running Scripts & Jupyter Notebook | Data Types & Variables | Identifiers | Literals | Type Casting | Comments | Command Line Arguments | Operators | Conditional Statements | Indentation | Loops (for, while, range) | Break, Continue, Pass | Nested Loops | Strings | Lists & Comprehensions | Tuples | Sets | Dictionaries | Functions | return Statement | Argument Types | Scope (Global vs Local) | Recursion | Lambda, Filter, Map, Reduce | Modules (Built-in & User-Defined) | OOPs | Classes & Methods | Constructors | Inheritance | Abstraction | Polymorphism | Encapsulation | File Handling | Read & Write Files | Modes | Exception Handling | try, except, finally | Python with MySQL | Regular Expressions | Web Scraping with requests & BeautifulSoup

Analytics With Python

NumPy : Introduction to NumPy | NumPyArrays | Creating Arrays | Array Attributes (Shape, Size, dtype) | Array Indexing and Slicing | Array Operations (Arithmetic, Aggregation) | NumPy Functions | Mathematical Functions | Statistical Functions | Linear Algebra Functions | Multi-Dimensional Arrays | Reshaping Arrays |

Pandas : Introduction to Pandas | Series and DataFrames | DataFrames Basics | Creating DataFrames | Reading and Writing Data | Data Types and Handling Missing Values | Indexing and Selecting Data | Indexing Methods: loc, iloc | Boolean Indexing | Selection Based on Conditions | Data Manipulation | Adding and Deleting Columns | Handling Missing Data | Grouping and Aggregation | Merging and Joining DataFrames | Craft Your Data | Data Collection Techniques | Data Cleaning and Preparation (Raw to Processed)

Matplotlib : Line, Scatter, Bar, Histogram, Box Plots | Titles, Labels, Legends | Custom Styles & Annotations | Axis Customization

Seaborn : Pairplot, Correlation & Distribution Plots | KDE, Box, Line, Scatter Plots | Confidence Intervals | Custom Visualizations

MACHINE LEARNING (ML)

Supervised Learning

ML Fundamentals : Introduction to Machine Learning | ML Modeling Flow | Types of ML | Difference Between AI, ML, and Deep Learning

EDA (Exploratory Data Analysis) : Handling Missing Data (Imputation Techniques) | Data Scaling & Normalization (Min-Max, Standardization) | Encoding Categorical Data (One-Hot Encoding, Label Encoding) | Feature Selection & Feature Engineering | Outlier Detection and Handling | Handling Imbalanced Data (SMOTE, Undersampling, Oversampling)

Supervised Learning Regression : Simple Linear Regression | Multiple Linear Regression | Polynomial Regression | DecisionTree Regression | Random Forest Regression | Regularization (Lasso & Ridge) | Model Evaluation Metrics (R^2 -score, MSE, MAE, RMSE)

Supervised Learning Classification : Logistic Regression | K-Nearest Neighbors (KNN) | Decision Trees (Including Pruning Techniques) | Random Forest | Support Vector Machine (SVM) | Model Evaluation Metrics (Accuracy, Precision, Recall, F1-score, Confusion Matrix, ROC-AUC)

Ensemble Learning & Advanced ML Algorithms : Bagging & Boosting | AdaBoost | Gradient Boosting and XGBoost

Unsupervised Learning : K-Means Clustering | Hierarchical Clustering | DBSCAN | PCA (Principal Component Analysis)

Model Optimization : Cross-Validation Techniques | Hyperparameter Tuning (GridSearchCV, RandomizedSearchCV) | Bias-Variance Tradeoff

Model Deployment Basics : Introduction to Streamlit for ML Model Deployment | Creating a Basic Web Application for ML Predictions

ARTIFICIAL INTELLIGENCE (AI)

Deep Learning (DL)

AI vs ML vs DL | Applications of AI | Conventional AI vs GenAI | Future of AI | Introduction to Deep Learning | Perceptron Model | Introduction to Tensorflow and Keras

Neural Networks

Activation Functions in NN | Loss Functions | Optimization Technique | Regularization Techniques | Callbacks | Introduction to CNN | Architecture of CNN - Kernel / Filter, Stride, Padding, Activation Function Max Pooling and Avg Pooling

Computer Vision (CV)

Object Detection | Region Proposal Techniques | Semantic Segmentation | Working with images | Working with Videos | OCR | Media Pipe - FaceMesh, Pose Detection

Natural Language Processing (NLP)

Introduction to NLP | Text Preprocessing | Text Vectorization and Classification | Embedding Layer in Natural Language Processing | Sentiment Analysis | Sequence Model | Machine Translation | Introduction to LLM

Building Chatbot

Creating Chatbot | Understanding Features | Adding Functionality

Time Series Analysis

What is Sequential Data & Time Series | Functional Relationship | Components of Time Series | Mathematical Representation of Time Series | ETS Decomposition | Classification of Time Series | Difference between ACF & PACF

Weather Forecasting - ARIMA & SARIMA Model

Introduction to AR and MA model | Stationarity & Differencing | SariMax of Seasonal Data | Identifying order $AR(p)$, $I(d)$, $MA(q)$ | Implementation of ARIMA

Stock Price Prediction - Sequence Model

Introduction to Sequence Models (RNN, LSTM) | Preparing Time Series Data for LSTM | Forecasting using LSTM | Future Forecast

Natural Language Toolkit

Projects & Case Studies

Dmart Analysis

DMart Sales to optimize inventory, pricing, and profitability.

POWERBI

FinTrack : Smart Financial Analytics

Monitor financial health with real-time analytics, revenue tracking, and expense management for data-driven decisions.

DRIVEN DECISION

EcomLens: Business at a Glance

Track online store performance with customer behavior insights, sales trends, and inventory analytics.

TABLEAU

Data Analysis of Cab Booking Systems

Analyze ride data and understand customer preferences for better decision making in cab services.

SQL

QuizMaster: The Ultimate Challenge

A fun and interactive quiz with real-time scoring and a variety of question formats to enhance learning

PYTHON

Python-Web Scrapping

Automate data extraction from websites using Python to gather and process structured information efficiently.

PYTHON

Data Visualization Automobile Data

Clean, transform, and visualize automobile industry data to uncover insights and trends.

PANDAS

FoodHub: Online Food Ordering System

An end-to-end database case study covering order management, customer tracking, and restaurant insights.

SQL

House Price Prediction

Build predictive models to estimate house prices based on location, size, and market trends.

Machine Learning

Customer Churn Prediction

Identify potential customer attrition using machine learning algorithms.

Machine Learning

Loan Default Prediction

Predict loan defaults using Bagging and Boosting Techniques.

Machine Learning

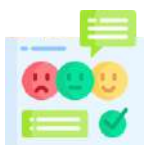

Customer Segmentation

Group customers based on behavior and preferences to enhance marketing strategies and customer engagement.

Machine Learning

Sentiment Analysis on Amazon Reviews

Analyze customer sentiments on Amazon product reviews using NLP techniques for business insights.

Artificial Intelligence

Image classification using CNN

Train deep learning models to classify images accurately across various categories.

Artificial Intelligence

Weather Forecasting ARIMA/SARIMAX

Develop time-series forecasting models to predict weather conditions with high accuracy.

Artificial Intelligence

Email Spam Detection

Implement machine learning algorithms to filter and detect spam emails effectively.

My Journey To Success...

Krish
Dhanda

BCA

Data Analyst

Scan for Video

I'm Krish Dhanda, a proud student of Itvedant. I have completed my Bachelors of Computer Application (BCA) from Jagannath Institute of Management Study, Vasant Kunj. I was very excited to do something new and gain knowledge in the Data Science field. Within 5 months of joining the course, I got a wonderful opportunity to work at STJ Electronics Pvt. Ltd. The hands-on learning and guidance I received truly helped me grow in the field of Data Science. The course structure was practical, and the support from the faculty was incredible. I'd definitely recommend Itvedant to anyone looking to start their career in Data Science.

Nikita
Ramakrishnan

B. Pharma

Data Analyst

Scan for Video

The reviews were right, I'm very satisfied with what I've studied here at Itvedant. "I'm Nikita Ramakrishnan, pursuing Data Science & Analytics with AI at Itvedant, alongside my Pharmacy + MBA at NMIMS. What impressed me most was the supportive environment, clear career guidance, and practical training, from communication skills to tools like Power BI. The learning portal, mock interviews, and job-ready approach made my experience even better. Even if you miss a class, recorded lectures and assignments keep you on track. The mentors genuinely care and check in regularly to support your progress. Itvedant truly delivers what it promises.

Our Happy Learners...

Surendra Potphode
(MCM)

I've worked with KPO however I'd decided to switch into IT sector as it's my dream to work in IT sector. I was searching for the respective center where I can gain the knowledge, and I enrolled in IT Vedant institute after suggestion from reputed industry expert, so I approached there and got the details about the Data Science course with modules in offline mode and consistency of completing the modules perfectly. I have cracked the interview in Quadron I solutions.

Sarang Kokane
(B.E)

My experience at ITVedant Institute has been highly positive. The course on data science and analytics is well-structured, with practical sessions that enhance understanding. The faculty is knowledgeable and supportive, making learning both engaging and effective.

Shrivatsa.S. Desai
(B.E)

About the of course Data Science and Data Analytics with AI, the trainer here is excellent in teaching concepts very happy with the way I am taught and my concepts are cleared whenever I want may I be in class or at home. Trainer is friendly and professional with excellent teaching skills. We are provided with a portal and our syllabus is neatly structured into Modules and we also have content to learn from this module. HR sessions are carried out, where our resume are curated personally and mock interviews, group discussions, introductions and soft skills are taught. Personally liked these sessions

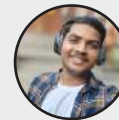

Pranit Bandkar
(B.E)

I have joined Data Science course in ITVedant. The data science course is well-structured and informative. The lecturers are excellent, with deep knowledge of the subject and the ability to explain complex concepts clearly. The coordinator team is also fantastic—they are approachable, supportive, and always ready to assist with any queries. I highly recommend this organization to anyone looking to enhance their skills in data science!

Riya Chavan
(B.E)

I have enrolled at Itvedant for a Data Science course, it's a solid option, especially if you're looking for a job-oriented program with practical exposure. The curriculum is designed to cover key topics like Python, python libraries, sql, excel, powerbi However, ensure the teaching style of Amruta mam and i have got best environment for learning and growing, also collaborative friends over here

Dhanraj Pandhare
(B.tech)

I have joined It vedant for the course of Data science and analytics . The faculty plus the training staff are very well versed in the subject. The constant assignments and assessment helps me to understand the course more clearly and in detail. The trainers and faculty are very kind and polite and always ready to help solve any doubts.

Shraddha Thakur
(B.Com)

As a current student pursuing Masters in Data Science and data analysis with AI at Itvedant Institute, I am extremely pleased with the quality of education and support I am receiving. The curriculum is comprehensive, covering both foundational and advanced topics, which ensures that students develop a strong understanding of Data Science. The instructors are experienced professionals who are not only knowledgeable but also very approachable, always willing to clarify doubts and provide additional guidance. The institute also provides excellent resources and tools, including access to the latest software and technologies used in Data Science.

Omkar Desai
(B.Com)

I enrolled in Data Science course at IT Vedant Classes with no IT Background. The variety of courses offered was impressive, covering everything from beginner-level to advanced topics. Moreover the classes not only focused on skills development but also provided excellent job placement assistance. This led me to secure a job at a reputable tech firm after completion of my course. Manasvi Mam were very supportive provided assistance on preparation for interviews. And also the teachers I encountered was not only highly knowledgeable but also IT experienced professional. They brought real-world experience in the classroom, which made the learning experience both engaging and practical.
